PROFESSIONAL SUMMARY

Front End Developer focused on web and Android applications, with experience independently building mobile interfaces, web back-office systems, Laravel REST APIs, and MySQL data workflows. Delivered operational attendance, point-of-sale, and education platforms through implementation, testing, and deployment. Additional strengths in UI/UX design, digital design, and QA/API testing.

TECHNICAL SKILLS

Web & Android: HTML, CSS, JavaScript, Bootstrap, Laravel Blade, Flutter, Dart, Riverpod
Backend & Data: PHP, Laravel, REST APIs, Laravel Sanctum, MySQL, database migrations
UI/UX & Design: Figma, Adobe Photoshop, wireframing, prototyping, digital design
QA & Delivery: Postman, PHPUnit, Flutter Test, Playwright, Git, GitHub Actions, deployment

PROFESSIONAL EXPERIENCE

PT Hidup Sukses Foloni

Front End Development, UI/UX, Digital Design & QA | Feb 2023 – Present

- Independently developed Android and web interfaces, backend services, API integrations, and administration workflows for internal operations and commerce applications.
- Designed and refined user flows, responsive interfaces, and digital assets; tested functionality and usability across applications.
- Implemented database-backed features and supported staging, production deployment, issue resolution, and iterative improvements.

PT Trijaya Pratama Futures

Freelance UI/UX Designer | Feb 2023 – Aug 2023

- Designed Figma interfaces and user-flow concepts for a trading application, focusing on readable financial information and consistent interaction patterns.

ALLSHOP Malaysia

Freelance Digital Designer | Jun 2021 – Aug 2021

- Produced promotional design materials and opening-video assets, including storyboards, visual sequencing, and presentation content.

SELECTED PROJECTS

Field Operations & Attendance Platform

Android & Web Developer | Flutter, Dart, Laravel, PHP, MySQL, Blade, REST API

- Built Android attendance and field-reporting flows with location services, camera/photo capture, input validation, and API integration.
- Developed Laravel APIs, MySQL workflows, and web back-office features for approvals, reporting, network data, and interactive maps.
- Web production deployed in 2026; Android available as a direct-install APK. A documented backend release passed 228 tests and 2,166 assertions.

Retail POS & Inventory Platform

Android & Web Developer | Flutter, Dart, Riverpod, Laravel, MySQL, REST API

- Developed product catalog, checkout, sales history, inventory, invoice, and reporting flows across Android and the web back office.
- Implemented backend transaction and stock workflows with database consistency safeguards, API integration, and administrative functions.
- Backend and web administration deployed in 2026; Android APK distributed for testing. Documented build 0.1.5 passed 75 Flutter tests, with QA using a physical Android device.

Education Services & Operations Platform

Web Developer | Laravel, PHP, MySQL, Blade, Bootstrap, JavaScript

- Built the public website and administrative application covering service orders, payment-proof review, academic tracking, and user permissions.
- Implemented interactive assessments, automatic scoring, database workflows, and automated deployment through GitHub Actions.
- Website deployed in 2026; the documented test run passed 161 PHPUnit tests, with additional browser checks using Playwright.

Reporting & Monitoring Dashboard

UI/UX Designer & Front End Developer | Bootstrap

- Designed and implemented a reporting dashboard from interface concept through responsive web presentation, prioritizing monitoring clarity and information hierarchy.

ADDITIONAL SELECTED WORK

UI Design & QA: E-Commerce Mobile App – UI & QA (Figma-based interface work and functional testing).

UI/UX Design: Trading Mobile App – UI Design; Corporate Website – UI/UX Case Study.

Frontend Development: Corporate Website – Industrial Profile; B2B Product Catalog Website (Bootstrap).

EDUCATION

Universitas Terbuka | Bachelor’s Degree in Information Systems (In Progress), 2025 – Present
